Sustainability Package [DSP]

No-cost option

The Sustainability Package combines the Vegan Package including:

- Multifunction sports steering wheel in ARTICO man-made leather
- White open-pore natural fibre honeycomb design sustainable trim

The globally renowned ‘The Vegan Society’ has evaluated and certified as vegan all soft-touch surface materials in the Vegan Package for the interior of the electric GLC – from the seat upholstery to headliner, from pillar and door panels to carpeting. Customers can be assured that the tested surfaces made from the high-quality ARTICO man-made leather and textiles contain no animal-derived products.

The white open-pore natural fibre honeycomb design sustainable trim lends your vehicle interior an individual look. It blends in harmoniously while also creating exciting contrasts, thereby reinforcing and emphasising the interior design. At the same time, the trim element is an enduring quality attribute of a meticulously crafted premium product.

Refinement Package [DRP]

£2,500

Elevating your driving experience to unprecedented levels with the Refinement Package.

With AIRMATIC air suspension and rear axle steering, you experience noticeably more driving comfort and agility. The air suspension impresses with either sporty dynamics or high comfort. Thanks to rear axle steering, you benefit from particularly agile or confident handling, depending on the speed, and a smaller turning circle.

The package consists of:

- AIRMATIC air suspension
- Rear axle steering (up to 4.5°)

The AIRMATIC system includes:

- Adjustable suspension level
- Intelligent damper adjustment
- Intelligent damper control
- Intelligent level control
- Lowering the rear for easier loading and unloading

Some of the model features, optional extras and colours shown may not be available, or may be available in a difference specification, or at a different price.

Trailer Coupling with ESP® Trailer Stabilisation [550]

£1,000

Expand your transport options: You can hitch up trailers or caravans as well as mount bicycle racks. The fully electric trailer hitch moves into position at the press of a button or swings completely back after use – without you having to get your hands dirty.

The package includes:

- ESP® trailer stabilisation
- Tow bar

When towing a trailer, ESP® trailer stabilisation can automatically intervene in critical situations. It is automatically active from a speed of 40 mph.

If undesirable swaying movements are detected, the trailer stabilisation actively dampens them with the help of wheel-specific, reciprocal brake applications. In most cases this is already sufficient to reduce dangerous vibrations. If necessary, the system also reduces the speed: for this purpose, the engine torque is reduced and the vehicle is braked over all 4 wheels. Your vehicle recognises the trailer automatically as soon as the electric plug is connected.

Running Boards [846]

£1,000

The aluminium-look running boards are mounted at the side at the height of the side skirts and facilitate access at the front and in the rear. They feature a sporty "shaped" design and enhance the SUV character of your vehicle.

"Shaped" design: The running boards are narrower in the front and become wider towards the rear. This makes it easier to get in and out of the front of the vehicle as well as to conveniently load a roof box.

Anti-slip rubber studs: Rubber studs on the running board provide better footing when getting in and out.

22kW AC Charging [84B]

£1,000

With the enhanced AC charging system, you can charge your vehicle quickly and easily with up to 22 kW (3-phase) at suitable public charging stations or wallboxes.

This shortens your charging times considerably if you have high-powered AC charging available to you.

¹The indicated values were determined according to the prescribed measurement method -Worldwide Harmonised Light Vehicle Test Procedure (WLTP). Figures shown may include options which are not available in the UK. Battery Electric Vehicles (BEV) require mains electricity for charging, range figures determined with the battery fully charged. These models require mains electricity for charging ^{*}Figures shown are for comparability purposes; only compare with other cars tested to the same technical procedures. Figures may not reflect real life driving results, which will depend upon a number of factors including factory-fitted options, accessories fitted (post registration), variations in weather, driving styles and vehicle load. Further information about the test used to establish fuel consumption and CO₂ figures can be found at <http://www.mercedes-benz.co.uk/WLTP> ²A different first year rate of Vehicle Excise Duty (Road Fund Licence) applies for new cars. ³The recommended on-the-road price includes the Road Fund Licence applicable to the standard model plus delivery charge (£780.00 incl. VAT), new vehicle registration fee (£55.00) and number plates (£25.00 incl. VAT). VAT is calculated at the standard rate of 20%. Some of the model features, optional extras and colours shown may not be available, or may only be available in a different specification, or at a different price
